Made to measure online

GET THE LOOK.....

Here comes the [Semi Sheer!](#) This is the sheer that allows soft filtered light in, yet it isn't totally "see through".

GET THE LOOK with Winton Sheer, a beautiful herringbone weave from one of our favourite fabric houses WILSON FABRICS.

Pictured below are the eight earthy neutral colours and you can find them in our SHEERS Category.

The fabric is a Linen/Polyester blend which means that you get all the gorgeousness of Linen but the practicability of Polyester.

Love the idea for your house but don't think you can achieve it online?

Yes, you can!...[START DESIGNING](#) right now!

"Design is a funny word. Some people think design means how it looks. But of course, if you dig deeper, it's really how it works." Steve Jobs

And this is the track....

Our GET THE LOOK photo has the latest trend in curtain headings.....the "Wave" heading. The track required for this is a 28mm Tubeslider with Snap Tape.....or sometimes called S-Fold Tape.

Colours are SATIN SILVER and SATIN BLACK. Ask us about other colours.

Did you know that at OnlineCurtains.com you can elect to have your track sent first? This is so you can

fine tune those last few millimetres to get a perfect "Made to Measure" curtain.

Once your track is installed, the finished length of your curtains will be the measurement from the underside of the track to the floor, minus 15mm.

What people are saying about us....

Oh my, how much do we love it when we receive emails like this:

"We have received the curtains and they are fantastic. It's been a pleasure dealing with you and will definitely be recommending you to our friends."

"Thank you very much for your advice and patience over the last 6 months or so, I'm really pleased with the results and I think you provide a great service."

And you don't seem to mind our input.....

"Thank you so much for pointing out my mistake, I really appreciate it."

"I really appreciate the questions - and fully understand the reason!"

And we don't mind your's either....

Tip - Fit your track above the architrave so that you can't see the back of the pleats and hooks from outside!
