You will be able to obtain an Online Quote immediately.

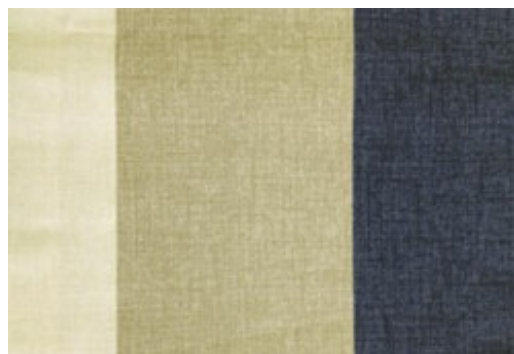

Curtains really do make a house a home.

Invest wisely by using our blackout lining on uncoated fabrics for the best insulation.

You can find this great range of PRINTS and STRIPES in our PRINTED FABRICS category. The beautiful contemporary florals and block stripes co-ordinate fabulously.

The designs are JAVA, SUMATRA and BALI.

See other colours on our website....

SO WHY SHOULD I LINE MY CURTAINS?

- LININGS assist with insulation in summer and winter to keep your power costs down.
- They protect your fabric from the UV rays thereby protecting your investment.
- They ALSO cut out light transference to

darken your room.

AND they make the folds of the curtains hang better.
